

Kim Van Ha

Senior Developer

SUMMARY

I am a Senior Frontend Developer with almost 5 years of experience in JavaScript, ReactJS, and Next.js. I specialize in building reusable components using MUI 5 and Ant Design following Atomic Design principles. I have knowledge about unit testing using Jest and React Testing Library, and end-to-end testing with Cypress. My project domain focus on Logistic, Finance, Ecommerce, ...etc

I also have experience with AWS, CI/CD processes, and basic NodeJS and ExpressJS for backend tasks.

Specialties

- Almost 5 years of experience in developing web applications with ReactJS, HTML, CSS, JavaScript, and Next.js.
- Good English communication skills.
- Strong experience in UI development using ReactJS, HTML5, CSS, JavaScript, jQuery, and Next.js.
- Expertise in building Design Systems based on Storybook, Material Design, and Ant Design, following the Atomic Design methodology.
- Good knowledge of design patterns in JavaScript.
- Proficient in Unit Testing with Jest
- Working knowledge of web protocols and standards (HTTP, HTML5/XHTML/XHTML-MP, CSS3).
- Proficient in customizing CSS frameworks like Bootstrap and Foundation using CSS preprocessors such as LESS or SASS, along with Compass.
- Implemented user-friendly plugins for Bootstrap, Ant Design, Material UI, and TailwindCSS for building components like carousels, accordions, and modal windows.
- Strong expertise in analyzing the Document Object Model (DOM) layout, DOM functions, and JavaScript functions, as well as cross-browser cascading styles using Firebug and Developer Tools.
- Proficient in using ReactJS to develop Single Page Applications (SPAs).
- Experienced in working with Redux architecture and applying complex Object-Oriented concepts to improve website performance.
- Familiar with ReactJS components, forms, events, keys, routing, Redux, animations, and the Flux concept.
- Experienced in version control tools like GIT and ClearCase for source code version management.
- Ability to quickly learn new technologies.
- Capable of working independently as well as part of a team.
- Able to work effectively under high pressure.
- Proactive thinker.

Industry Experience

- Experience in various domains: E-commerce, Logistics, Loyalty.

TECHNICAL STACKS

TECHNICAL EXPERTISE & SKILLS

Proficiency Description

1-Basic knowledge: Basic knowledge, needs much guidance and support in using the competence

2-Limited experience: Able to work in the area, needs some guidance in using the competence

3-Practical application: Good knowledge and skills, works independently, has sound experience in using the competence.

4-Applied theory: Advanced knowledge and skills, provides guidance and direction to others

5-Recognized authority: Exceptional knowledge and skills, perceived as an authority in this competence area, is innovative in using the competence.

Technology skills

Skill	Proficiency	Experience	Last used	Notes
Programming Language				
HTML & CSS	4-Applied theory	5y	2025	
JavaScript	4-Practical application	4y	2020	
Mobile				
React Native	2-Limited experience	1y	2023	
DevOps Tools				
GitHub	4-Applied theory	5y	2025	
Database Management System				
MySQL	2- Limited experience	2y	2022	

Cloud Platform				
AWS	2- Limited experience	2y	2023	
Application Deployment and Monitor				
App Center	2- Limited experience	2y	2023	
Sentry	3-Practical application	2y	2023	

EDUCATION

- Bachelor of Software Engineering – Post and Telecommunication Institute of Technology.

WORKING EXPERIENCE HIGHLIGHTS

Project: Changi Airport Smart Services (Jun 2025 – Present)

Developing and maintaining multiple web applications for Changi Airport, Singapore, focused on enhancing airport service experiences. The systems cover a wide range of services such as baggage handling and tracking, smart parking management, and member benefits. The platform aims to deliver a seamless, efficient, and user-friendly experience for travelers and airport members.

Project size: ~70 members

Role: Frontend Developer / Fullstack (ReactJS & AWS)

Responsibilities:

- Developed and maintained multiple web applications using **ReactJS** and **Next.js**, ensuring consistency across different repositories and services.
- Integrated and optimized APIs for various airport service systems, including baggage tracking and smart parking management.
- Built and deployed serverless backend functions using **AWS Lambda**, enhancing scalability and reducing infrastructure overhead.
- Collaborated closely with UI/UX designers to ensure responsive, accessible, and visually consistent user interfaces.
- Implemented authentication, membership registration, and reward management features to improve user engagement.

- Ensured code quality, performance optimization, and cross-browser compatibility across all web platforms.
- Participated in CI/CD setup and deployment on **AWS services** such as **S3, CloudFront, and API Gateway**.

Technologies:

- ReactJS, Next.js, TypeScript, REST API
- AWS Lambda, S3, CloudFront, API Gateway
- Git, Visual Studio Code

Project: RSupports (July 2024 – May 2025)

The project involves developing and enhancing a Chat and Video Call platform integrated with a 3D system, designed to facilitate real-time communication and interaction. Users will be able to engage and interact through a 3D Unity interface, creating virtual meeting rooms and online marketplace environments.

The application will incorporate fundamental social networking features, such as voice and video calls, messaging, friend connections, and various other functionalities. This comprehensive platform aims to provide a seamless and immersive communication experience.

Project size: 100 members.

Roles: Frontend Developer

- Developed and enhanced the user interface for real-time chat and video call functionalities using modern frontend technologies.
- Integrated 3D environments created with Unity into the web platform, ensuring smooth and seamless user interactions.
- Collaborated with backend developers to ensure real-time data synchronization for messaging and video calls.
- Implemented social networking features such as friend connections, notifications, and user profiles within the platform.
- Ensured cross-browser compatibility and responsive design for an optimal user experience on various devices.
- Conducted performance optimization to ensure fast load times and efficient state management.

Technologies:

ReactJS, WebRTC, Typescript, Storybook, RestAPI, 3D Unity

Project: OMJS NCS (Jan 2024 – July 2024)

Developing and enhancing systems and platforms for online marriage registration and event organization, it not only serves one religion but also various other religions. It can help customers achieve the fastest and most convenient services.

Project size: 20 members.

Roles: Frontend Developer

- Engaged in the project using ReactJS and constructed the interface based on the Ant Design System.
- Created efficient and user-friendly web pages, ensuring smooth integration with data systems and APIs.
- Collaborated closely with the design team to ensure that the web interface accurately reflects the predefined design and user experience.
- Optimized the user experience, ensuring cross-platform compatibility and fast page load times.
- Implemented changes, performed maintenance, and conducted upgrades to the website to meet specific requirements and ensure security.

Technologies:

- ReactJS, TypeScript, Material UI, Rest API.
- Visual Studio Code.
- Git.

Project: EVHub (May 2023 – Jan 2024)

Developing a website for Volkswagen customers to facilitate their connection with the brand and provide detailed information about the latest car models. Users will be able to answer questions to help them find their ideal and most suitable car. Additionally, they can view the locations of charging stations on a map, enhancing the overall user experience.

Project size: 50 members.

Roles: Frontend Developer

- Engaged in the project to develop the website using ReactJS and constructed the interface based on the Design system of Volkswagen.
- Created efficient and user-friendly web pages, ensuring smooth integration with data systems and APIs.
- Optimized the user experience, ensuring cross-platform compatibility and fast page load times.

- Implemented changes, maintenance, and upgrades to the website to meet specific requirements and maintain security.
- Implemented Unit Test for app with JEST

Technologies:

- ReactJS, TypeScript, Material UI, Rest API, JEST
- Visual Studio Code.
- Git.

Project: Corsair (Dec 2022 - May 2023)

Implement a website specialized in offering gaming peripherals, accessories, and personal computer equipment from the Corsair brand, allowing users to search, filter according to criteria, and purchase a product that best suits their requirements.

Project size: 200 members.

Roles: Frontend Developer

- Develop front-end using ReactJS (NextJS)
- Fix bug and give solution for UI issues.
- Cross review codes with team members.
- Report task status to the customer managers.

Technologies:

- NextJS, TypeScript, Apollo – GraphQL, Apollo Client, TailwindCss, Shopify, Algolia, GraphQL
- Visual Studio Code.
- Git.

Project: Taffi (May 2022 - Dec 2022)

Application to allow stylist customize different styles for customer. The application run on both phone and desktop to support various user audience, for enhanced shopping experiences.

Project size: 20 members.

Roles: Frontend Developer

- Develop front-end using ReactJS (NextJS)
- Fix bug and give solution for UI issues.
- Cross review codes with team members.
- Report task status to the customer managers.

Technologies:

- Browsers (Safari).
- ReactJS (NextJS), Material-UI.
- GraphQL
- Visual Studio Code.

- Git.

Project: NGV Creative Index (Jan 2022 - May 2022)

Build an application with NextJS Framework, TailwindCSS and Animation library to show with customer about statistic local brand companies

Project size: 10 members.

Roles: Frontend Developer

- Develop front-end using ReactJS (NextJS)
- Fix bug and give solution for UI issues.
- Cross review codes with team members.
- Report task status to the customer managers.

Technologies:

- Browsers (IE, Chrome).
- ReactJS, TailwindCSS, AWS
- Visual Studio Code.
- Git.

Project: OrderBuddy Web Application (Mar 2021 - Jan 2022)

Build a web application restaurant to manage and support customer order and payment

Project size: 60 members.

Roles: Frontend Developer

- Develop front-end using ReactJS (NextJS)
- Fix bug and give solution for UI issues.
- Cross review codes with team members.
- Report task status to the customer managers.

Technologies:

- Browsers (IE, Chrome).
- ReactJS, TailwindCSS, StripeAPI
- Visual Studio Code.
- Git.

Project: Graphene (Jul 2020 – Mar 2021)

Build an internal website to store and interact with information like lecture, video, author and journal. The website receives information via API, stores information in tables and makes it interactable by viewing in more details or exporting to excel documents for every internal operations

Project size: 50 members.

Roles: Frontend Developer

- Responsible for creating new functionalities with proper requirements.
- Participated with the product owner to clarify the requirement.
- Identified users to define the user's experiences.

Technologies:

- Browsers (IE, Chrome).
- ReactJS, TypeScript, Sass, Rest API
- Visual Studio Code.
- Git.
